

No Mason! No Mortar! No Mess!

***Patented Insulated Lightweight
Easy Install
Faux Stone Siding Panels
Post Covers and Column Wraps***

NextStone is manufactured with a specially formulated solid polyurethane that is combined with fire retardants and UV inhibitors. NextStone™ insulated faux stone siding panels and accessories are cast from actual stone and rock patterns. Developed in 1997, the panels hold a US Design Patent and the unique manufacturing process gives NextStone™ products the most authentic faux decorative stone siding on the market. NextStone™ siding panels can be easily installed as they are lightweight, weighing only about one (1) pound per Square Foot. The Decorative Stone Siding Panels and Accessories also eliminate the need for additional materials, equipment or labor. NextStone™ manufactures a quality exterior building product that can also be used as an interior decorative wall panel. The Patented Interlock, Weep Channels, and In-Mold Coating make NextStone™ stand out from all the rest!

Tongue and groove
top-to-bottom interlock.

Recessed panel back and weep channels.

U. S. Pat. No. 7,748,183

Features & Benefits of Using NextStone™

- ⇒ **Cost Effective** Installing NextStone™ will save contractors and DIY home owners both time and money when it comes to improving or remodeling residential and commercial buildings compared to installing natural stone, brick, or cast stone veneers.
- ⇒ **Durable and Lightweight** Weighing only 1 pound per Square Foot, NextStone™ panels are made solid through out, are reinforced with recycled PVC, and are resistant to weathering. NextStone™ is made to withstand radical changes in temperature, varying levels of rain and snow, and extreme environmental conditions. NextStone™ panels will acclimate to all types of weather conditions.
- ⇒ **Energy Savings with Increase of R-Value** NextStone™ adds insulation value saving energy. "R-Value" is the ability of building materials to resist heat transfer. NextStone™ has an R-Value of 4.5 per inch of thickness when used for exterior applications. This additional insulation will help reduce energy costs by naturally decreasing heating and cooling functions.
- ⇒ **Certified Green Product** NextStone™ products are manufactured using recycled materials and do not take from natural resources. The process of harvesting rock, clay and natural stone materials does not preserve the environment. The damage is increased when quarrying, transporting, and processing these raw materials as they demand a significant amount of energy and resources. NextStone™ has replicated the look of natural or cultured stone that has the visual appeal and provides energy savings to any home or building.
- ⇒ **Non-Flammable** NextStone™ products are rated Non-Flammable, meaning they will not hold a flame and will not burn once the flame source is removed. NextStone™ products are made with Fire Retardants.
- ⇒ **Low Maintenance** NextStone™ requires minimal maintenance. The exterior siding panels do not require painting, staining, or waterproofing. NextStone™ panels keep their beautiful, natural appearance with only the occasional spray down using any backyard hose. The panels are manufactured with a fade resistant in-mold coating and will retain the look from the time of purchase and for years to come.
- ⇒ **Versatile** NextStone™ Decorative Faux Stone Siding can be applied almost anywhere inside or outside a home or workplace: window trims, full house wrap, porch pillars, deck siding, deck posts, wainscoting, knee walls, pony walls, facades, islands, patio enclosures, over existing brick or foundation, mobile home skirting, fireplace surrounds, interior accent walls, or full and partial siding. Any wall or vertical surface that needs coloring, texture, or a new surface can be covered with NextStone™ products.
- ⇒ **20 Year Warranty** NextStone™ stands behind it's products with a 20 Year Prorated Warranty.

NextStone™ Castle Rock Panel

Available in five designer colors. Panels dimensions: 15¼" x 43¼" x 1¼" .

16" Columns using Interlocking Outside Corners

**Create a 16" x 16" Column in any rock profile!
Stack them to reach desired height!**

A) Slatestone 16" Column (4 Left or 4 Right corners per course)
Build out desired column to be wrapped at no more or less than 12 $\frac{3}{4}$ " x 12 $\frac{3}{4}$ "

B) Random Rock 16" Column (4 Left or 4 Right corners per course)
Build out desired column to be wrapped at no more or less than 14 $\frac{3}{4}$ " x 14 $\frac{3}{4}$ "

C) Castle Rock 16" Column (4 Left or 4 Right corners per course)
Build out desired column to be wrapped at no more or less than 13 $\frac{3}{4}$ " x 13 $\frac{3}{4}$ "

**** Not Pictured Below**

Brick 16" Column (4 Left or 4 Right corners per course)
Build out desired column to be wrapped at no more or less than 13" x 13"

Country LedgeStone 16" Column (4 Left or 4 Right corners per course)
Build out desired column to be wrapped at no more or less than 14 $\frac{3}{4}$ " x 14 $\frac{3}{4}$ "

Stacked Stone 16" Column (4 Left or 4 Right corners per course)
Build out desired column to be wrapped at no more or less than 13 $\frac{5}{8}$ " x 13 $\frac{5}{8}$ "

Sandstone 18" Cap 18" x 18" x 3 $\frac{1}{2}$ "
Colors: Brown, Buff, Charcoal, Graphite, Gray, Onyx & Red
(Shown on each column below - Caps sold separately)

(see the NextStone™ Install Manual for Details)

NextStone™ Product Test Data

NextStone™ has conducted extensive testing on its products and proprietary non-flammable in-mold coating system. The details and results of some testing are as follows:

NextStone™ Hardness / Adhesion Test

Test Purpose: The hardness / adhesion of the coating to the substrate depends on the process used to finish the substrate, the coating thickness and the drying of the coating.

Test Results: Minimum hardness requirements based on anticipated use were met. Required class for adhesion was also met.

NextStone™ Xenon Test

Test Purpose: In the natural environment, rupture may occur due to the factors of temperature, humidity, sunlight and oxidation resulting in the color, gloss, hardness, adhesion and flexibility of the coating being changed. We use the ARC Artificially Accelerated aging test to measure the weathering resistance of the coating.

Test Results: No evidence of surface deterioration, surface shrinkage, objectionable color or gloss change, delimitation, lifting, cracking, pitting, blistering or other degradation.

NextStone™ Salt Spray Test

Test Purpose: Rusting, bubbling and fading can occur due to salt spray on all materials. This is especially true when the product is used around the seaside, at the beach and in industrial districts which have high strength salt spray (fog).

Test Results: No rusting, bubbling or fading occurred.

NextStone™ Hot / Cold Cycle Test

Test Purpose: The process for the hot / cold cycle test is as follows: The total cycle time is 5-10 cycles. The sample is put at a constant temperature of -20 degrees C for two hours and then at 50 degrees C constant temperature for 2 hours. The sample is then visually inspected for cracks, blistering or other visible damage.

Test Results: No cracking, blistering, etc. was observed.

Additional Panel Test Data

Structural Performance per ASTM E330-02

Excellent results for both Positive and Negative Wind Load.

Flame Spread per ASTM E-162 - Pass- Report # 87712-2

Colorfastness Test per ANZI Z124—No Color Change.
Report #87712-1

Full copy of all reports available upon request

NextStone™ Specifications

This Specification Guide is intended to be used in the preparation of specifications for a particular project or as a basis for an office master specification. In either case, it should be edited to meet actual conditions and requirements.

Part 1-General

1.01 Scope of Work: Furnish required material, labor, and equipment for complete installation of NextStone™ panels and related work shown on drawings or specified herein.

1.02 NextStone™ Rock Face Paneling.

1.03 Manufacturer: NextStone™, P.O. Box 39914 Denver, CO 80239 Toll Free: (866) 371-8232 NextStone.com

1.04 Submittals: Submit panel samples showing profile, size and color for approval prior to commencing work.

1.05 Composition of Material: NextStone™ products are made of uniquely formulated composite polyurethane, incorporating UV inhibitors and fire retardants.

Part 2-Materials of Construction

2.01 Materials: Handle and store panels according to manufacturer's instructions. Panels are installed with good quality deck screws (ceramic coated or stainless steel are recommended) and/or a high quality polyurethane based adhesive such as PL Premium Polyurethane Construction Adhesive. Concrete screws (Tapcon) are recommended for applications to concrete or cinder.

2.02 Other Materials: Use Touch-Up paint and Grout as provided by NextStone™.

Part 3-Installation Workshop

3.01 Inspection: Prior to commencing work, verify governing dimensions of building. Examine substrate flaws and defects.

3.02 Preparation: All substrate flaws and defects must be corrected prior to panel installation. Walls must be in plane and clear to receive siding.

3.03 Field Inspection: Upon installation completion, visually inspect for defective installation and manufacturing defects. Repair as necessary.

3.04 Clean Up: When panel installation is complete, clean panels with low pressure water to remove all foreign debris. Remove all packaging and remaining material from job site. (see the NextStone™ Installation Manual for Specific Details)
